

A rustic interior featuring a large wooden dining table with ornate chairs, a stone wall, and a chandelier. The scene is dimly lit, creating a warm and cozy atmosphere. The text 'VINTAGE WOOD' is overlaid in a large, white, serif font, with 'AND FORGED IRON' in a smaller, white, sans-serif font below it. A central logo contains the letters 'WFI' in a white, sans-serif font.

AND FORGED IRON

— YOUR SOURCE FOR RECLAIMED BEAMS, BOX BEAMS, FLOORING, AND MORE

## A ONE-OF-A-KIND LOOK

At Vintage Wood and Forged Iron, we take pride in offering top-quality reclaimed wood and creating stock and custom hand-forged ironworks. We personally source and prepare all materials to ensure their quality. Whether you're an architect, builder, or homeowner, we can help you create statement pieces for all your home or commercial projects.

When you're looking for a timeless aesthetic that brand-new materials just can't match, you can rely on us. We offer a wide variety of reclaimed wood and hardware, as well as hand-forged iron accessories and statement pieces to suit any style.

## WHAT WE DO

### RECLAIMED WOOD

For a one-of-a-kind look and outstanding character, reclaimed barnwood is the go-to material to make your project stand apart from the rest. From beams (hand-hewn, circular, and band-sawn) to siding, we have everything you need to bring your vision to reality. We specialize in creating custom mantels, flooring, planking, trim, and box beams out of our raw materials, and we offer a white-glove experience that includes vacuum kiln drying, custom sizes, and finishing.

### RECLAIMED FLOORING

There's no denying the popularity of hardwood flooring, but the warmth, character, and durability of reclaimed old-growth flooring is unparalleled. We offer heart pine, chestnut, hickory, and white and red oak. If you're looking for something specific, just ask! Save money by going with random width and length, or break down the sizing exactly how you want it. Our goal is to provide you with something that will last for generations.

## WHAT WE DO

### RECLAIMED BOX BEAMS

We offer all varieties of solid beams for structural timbers or mantels. But sometimes the weight of a large beam is just too much to install for decorative purposes. Our in-house craftsmen can help transform your space with custom reclaimed box beams that look identical to a full solid beam. Using a lock mitered edge, we assemble each piece by hand, blending the edges to create a seamless look.

### HAND-FORGED IRON

Sometimes the details make all the difference. From decorative hinges, brackets, and iron railings to three-tiered chandeliers, our team has the experience and skill to create hand-forged products that match your vision. We also offer stock hardware ready to ship.

## OTHER SERVICES

### BARN REMOVAL AND RECLAMATION

Have an old barn or building you no longer need? We offer removal and reclamation services. Let us carefully dismantle your barn and reclaim the wood and hardware, giving these time-tested materials new life.

### RECLAIMED HARDWARE

When we reclaim barnwood, sometimes we're lucky enough to find vintage hardware, too. We offer hinges, door handles, pulleys, light fixtures, and other pieces to give your project those perfect period details.

### VACUUM KILN DRYING

Whether you have timbers or planking, our premium vacuum kiln can dry to your specific needs. We can sticker and prep your materials for drying. Drop your lumber off, and let us handle the rest.
